The Netherlands Authority for the Financial Markets (AFM) is responsible for supervising the investment institution in connection with this document.

This key information document has been prepared as of January 1, 2024.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type: This product is an investment fund that can in principle be traded daily and has an unlimited maturity.

Objective: The investment objective is to achieve a return that, based on an evaluation period of three years, is at least equal to the return of the MSCI All Country World Index Net EUR (the "benchmark"). In addition to pursuing a financial return objective, it expressly aims to also add non-financial value by

employing an investment strategy based on positive impact. Especially by investing in companies that actively contribute to realizing the Sustainable Development Goals ("SDGs"), such as adopted by the United Nations (UN). At the same time a negative impact on planetary boundaries is limited, such as

specified by the Stockholm Resilience Center Rockström et al. (2009). The Fund has a sustainable investment objective, within the meaning of Article 9 of the Sustainable Finance Disclosure Regulation (SFDR).

- The fund invests in liquid shares of listed companies in Europe, North America, Asia and emerging markets.

- Companies in the fund are assessed on their environmental, social and governance achievements (ESG criteria). While taking account of the fund's return objective, the fund strives to achieve the highest possible ESG score in such a way that the ESG score of the fund's portfolio is at all times higher than the ESG score of the benchmark.

- To limit the investment risks, the portfolio is spread across countries, sectors and companies. The globally diversified portfolio consists of at least 75 companies. The following

criteria apply regarding active positions against the benchmark:

- Overweight or underweight positions in individual countries can be up to 30%.

- Overweight or underweight positions in individual sectors, as contained in the Global Industry Classification Standard ("GICS"), can be up to 20%.

- Overweight or underweight positions in individual companies are maximized at 5%.

- For efficient portfolio management, the fund may also invest in derivative products.

- The fund does not pursue its own foreign exchange policy. Currency risks in underlying investments are not hedged.

- The fund pays out a cash dividend at least once a year.

Intended retail investor:

Cardano Impact Equity Global is suitable for private and professional investors who invest for the long term. The investor takes into account that he may lose all or part of the investment. Investing in the fund is suitable for both the basic investor with at least some knowledge of the relevant financial markets and products and the advanced investor. The basic investor is in any case able to make an informed investment decision on the basis of the basic information provided to him or by the legally prescribed documentation.

Product term:

The fund has no end date. Cardano Asset Management N.V. may not unilaterally terminate the fund

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 6 out of 7, which is the second-highest risk class. That means the potential losses on future performance are estimated as high.

The product may be exposed to risks such as equity market risk, currency risk and ESG-risk. Please refer to the prospectus for more information.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Lower risk

Higher risk

The risk indicator assumes you keep the product for the period as stated in the table below. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. This product does not include any protection from future market performance so you could lose some or all of your investment.

Recommended holding period:

5 years

Example Investment:

€10,000

Scenarios

If you exit after 1 year

If you exit after 5 years

| | | | |
|---------------------|--|---------|---------|
| Minimum | There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment. | | |
| Stress | What you might get back after costs | €2,020 | €1,950 |
| | Average return each year | -79.81% | -27.90% |
| Unfavourable | What you might get back after costs | €8,020 | €8,830 |
| | Average return each year | -19.84% | -2.45% |
| Moderate | What you might get back after costs | €10,900 | €15,860 |
| | Average return each year | 9.02% | 9.66% |
| Favourable | What you might get back after costs | €14,640 | €20,030 |
| | Average return each year | 46.39% | 14.90% |

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest 10,000.00 €. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the product itself, and do not include the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Cardano Asset Management N.V. is unable to pay out?

As required by law and for your protection, the Fund's assets are held in a separate company, a custodian. Should Cardano Asset Management N.V. go bankrupt, this will have no direct consequences on the possibility of payment by the fund. If the fund is terminated or liquidated, the assets will be sold and you will receive an appropriate share of the proceeds, but you could lose some or all of your investment. Your loss will not be covered by any investor compensation or guarantee scheme.

What are the costs?

| | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs | €102 | €685 |
| Annual cost impact (*) | 1.0% | 1.0% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.7% before costs and 9.7% after costs.

| One-off costs upon entry or exit | | If you exit after 1 year |
|---|--|--------------------------|
| Entry costs | These are the costs that you pay when buying this product. This is without the one-time entry fee of 0.05%. The entry fee covers the average transaction costs incurred when you buy the fund. | €0 |
| Exit costs | These are the costs that you pay when selling this product. This is without the one-time exit fee of 0.05%. The exit fee covers the average transaction costs incurred when you sell the fund. | €0 |
| | | |
| Management fees and other administrative or operating costs | The management fee is 0.60% and serves to cover the costs incurred by the manager for managing your investments. | €60 |
| Transaction costs | The impact of the costs of us buying and selling underlying investments for the product. | €43 |
| | | |
| Performance fees | The impact of the performance fee. | €0 |

How long should I hold it and can I take money out early?

Recommended holding periode: 5 years

Given the nature of the fund's underlying investments, a minimum holding period of 5 years is recommended. The fund generally invests in risk-bearing assets. Investments in the fund are less suitable for investors with a short-term investment horizon. Exit fees may be charged at the product level.

How can I complain?

The customer can complain about the product, the activities of the product's developer or the party selling the product/ providing advice by contacting Cardano via our website.
