

### Fund Profile

Zwitserleven Mixfonds invests about half the portfolio in European equities and the other half in euro government bonds and corporate bonds, within a bandwidth of 45%-55%. If the fund managers expect equities to perform well, they may increase this weighting to a maximum of 55%. The same goes for bonds. The prices for equities and bonds often move in opposite directions, allowing the investor to profit from a more stable return. The fund's investment objective is to at least match the return of the benchmark. All debtors and/or (fixed income) securities in the investment universe obtain an ESG-score. The ESG-score of the portfolio will always exceed the ESG-score of the benchmark. The fund has sustainable characteristics and aims to contribute to long-term sustainability objectives in the field of the environment and social development and good entrepreneurship.
